EDUCATION

University of Colorado, Denver

Denver, CO

Bachelor of Arts in Computer Science | Cumulative GPA: 3.7/4.0

Aug. 2022 – May 2026

Relevant Coursework: Data Mining, Algorithms, Object-Oriented Programming, Cybersecurity Principles, Web API, Embedded Systems Programming, Mobile Programming

EXPERIENCE

Undergraduate Data Researcher

January 2026 – Present

Purdue University

Colorado Springs, CO

- Collaborated with a team of 8 researchers and corporate partner Orion Labs LLC to model transportation safety proactively using near-miss collision datasets.
- Built a user-facing analytical tool with Apache Superset, PostgreSQL, and Docker to visualize safety outputs for road engineers and transportation agencies.
- Integrated historical crash data with real-time traffic patterns to identify correlations between near-miss types and high-priority accidents.
- Developed cost-effective data strategies to improve accessibility of traffic data for informed safety decision-making.

Student Assistant

January 2026 – Present

University of Colorado, Denver

Denver, CO

- Support the CACE office by collaborating with staff on a monthly Newsletter Team covering student highlights, study tips, scholarships, and academic resources.
- Assisted the AANHPI Planning Committee in overseeing event planning and budget allocation for 4 Asian student organizations (ASA, SASE, FSA, VSA) at CU Denver.
- Supported a student-driven programming model by providing logistical guidance and resource coordination to empower student leaders in executing culturally significant campus events.

Vice President

January 2026 – Present

Society of Asian Scientists and Engineers (SASE)

Denver, CO

- Lead meetings and operations for a 20-member chapter, coordinating with student organizations and sponsors to grow partnerships and chapter reach.
- Organized professional and social events (Speaker Panels, Resume Workshops, cultural celebrations) while supporting recruitment and mentoring emerging student leaders.

PROJECTS

Credit Card Fraud Pattern Analysis Dashboard | *React, Node.js, Express, Supabase, PostgreSQL, Postman* 2026

- Full-stack fraud analysis platform with React/Vite and Node.js/Express for exploring and visualizing patterns in historical credit card transaction data.
- Built and tested a paginated REST API with CORS and Supabase service-role auth using Postman; designed a PostgreSQL data warehouse with 7 aggregation tables over 100k+ records.
- Coordinated a 4-person team across frontend, backend, database, and Python/scikit-learn data mining workflows.

Job Application Tracker | *React, Node.js, Express, MongoDB Atlas, JWT, Tailwind CSS, Postman*

2026

- Built a full-stack app with a Node.js/Express REST API and MongoDB Atlas, featuring JWT auth with bcrypt password hashing; tested all endpoints with Postman.
- Developed a drag-and-drop Kanban board in React and a \$group pipeline analytics dashboard for visualizing application status.
- Deployed backend to Render with environment-variable-based configuration following twelve-factor app principles.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, TailwindCSS, Bootstrap, pandas, NumPy, Matplotlib

Developer Tools: Git, GitHub, Docker, Android Studio, Apache Superset, Power BI, VS Code, Postman

Databases: PostgreSQL, MongoDB, Supabase, Firebase

Certifications: Cybersecurity & Secure Computing, NASPA Certified Peer Educator, NVIDIA Generative AI with Diffusion Models, Transformer-Based NLP Applications, AI for Anomaly Detection, Agentic AI Applications with LLMs
